## Description

The CCM Riscor 47K is perhaps the stick in this new Riscor line with the most bang for the buck offering key technology at a value. Riscor has always been about generating efficient loading to achieve a quick releasing shot in a low-kick package and the 47K does just that with PopMatrix Technology while still providing excellent control and accuracy from the Ascent Blade.

The 4TK features PopMatrix technology, a nice carry over technology seen in the Riboot Trigger as well as last year's Reckoner. PopMatrix is a unique visual technology that consists of carbon fibers which are permanently in tension due to the unique concave geometry through the taper of the shalt. The idea of this is to get easy loading, more efficient energy transfer and a faster range back as quickly as possible. COM has been able to come up with quantifilable measurements to show that the "Aff has the highest release rate from a CCM stock at its price point. The performance fibers that are found in the rib are also protected by an outer layer composed of protective fibers to put durability issues to reach this allow and the protection from the fibers of the bath which results in a load release, and feet in lities and refer forms.

As far a construction goes, the 47K is composed with a fuse construction goes, the 47K is composed with a fuse construction goes, the 47K is composed with a fuse construction made with a CCM propriety blend of action for her and foreigness throughout the entirety of the sixt. The material composition is what separates the 49K to the 47K; the 49K uses a bit higher quality materials which is a factor in performance and weight. The orientation of the fibers to the foreigness throughout the entirety of the sixt. Moving down to the blade, the 47K comes equipped with Ascent Blade as CCM's dangler stick, they really wanted to promote that great feel any puck handler would desire, so to achieve this the Ascent Blade is composed of a premium foam that provides an incredibly soft feel. And although it's meant to provide great feel, the fact that the blade increases in stiffness from heel to be provides hard, accounts and quick releasing shots off the toe.
